

Fastweb: Kick-off of Fast GDPR Suite, the Business solution for compliance with the new general regulation on data protection

Milan, 09 February 2018 - Fastweb presents **Fast GDPR Suite**, the full and secure integrated business solution, designed to simplify companies' compliance phase with GDPR, the new European regulation for personal data protection, which will come into force as of 25 May 2018.

Fast GDPR Suite is an offering portfolio that offers companies the best technological and organisational solutions based on the analysis of corporate requirements. Clarity and transparency are a distinguishing element of Fastweb's proposal, which provides the most suitable solution based only on an in-depth assessment of the corporate systems and procedures and which is used to identify the main action areas. The solution is based on the experience Fastweb has gained in the areas of IT Security and Clouds and allows companies to achieve and maintain over time, compliance with the GDPR owing to the rich portfolio of solutions offered.

The Fastweb solution ensures the highest levels of data protection, a strategic asset for companies which, as provided in the regulation, must be managed and protected with an integrated view and according to the highest security standards. With **Fast GDPR Suite**, companies will have the most advanced tools available to keep their clients' data safe and at the same time, protect themselves from cyber-attacks, which have increased by 10% in the last year alone and are often performed using unknown techniques that are increasingly difficult to combat with the solutions currently available on the market.

In addition to allowing efficient and secure management of the company's data and that of its clients, **Fast GDPR Suite** ensures the continuity of operations processes and data access, through back-up and disaster recovery solutions, for example, also in compliance with the GDPR.

Fast GDPR Suite is provided through Fastweb's latest generation infrastructures like its ultra-fast fibre optic network, certified Tier IV Data Centre and advanced Cloud & Security platforms, which guarantee the utmost service reliability, all with the support of a team of dedicated professionals.
